VOL. III.

BRITISH WARSHIPS

TO CORRELL RUSSIAN CRUISERS

Auxiliary Russian Cruisers in the Pacific will be Regulated by British Men-o-War

St. Petersburg, June 24. —British warships will be despatched to stop Russian auxiliary cruisers from interfering with shipping. They will certainly quit their depredations.

The retirement of the Grand Duke Alexis and Admiral Alexieff was not followed by the usual receipt of praise by the Emperor on their services. Far Eastern Committee has also been requested. This shows that the Emperor is anxious to wash his hands of the whole Manchurian situation. It improves Japan's case and incidentally brings peace to a nearer prospect.

KING MURDER TRIAL.

Dr. Braithwaite was called yesterday afternoon as witness in the King murder case to give evidence regarding an examination he had made of certain pieces of bone which had been taken to his office in January by Sergt. Anderson. He had examined the bones, and come to the conclusion they were portions of the right parietal bone of a human skull.

Dr. Huxley, who had been present at this examination, gave evidence along the same line.

Prof. Primrose, of Toronto, who had given evidence in the morning as to the examination of the articles sent him was recalled to identify the packages produced as those in which he had returned the articles to Constable Hiltensel.

Sergt. Anderson was recalled to identify the three bones given him by Hiltensel.

East Mintoanup repeated the story told by him at the first trial of having visited the prisoner and his companion in their camp and having dined with them, also of having visited the camp later when the mark of the fire was very much larger than before. Cross-examined, witness had no recollection lately, never saw the bones, would not like to see one from what he had heard of them.

Casimir Cardinal thought from the photograph Hayward was the man who came to his place one day last fall and got his two sons to help him hunt some horses. He had never seen the man since.

John Felix Cardinal, son of Casimir was one of the boys who had helped the missing man hunt the horses. He told of the appearance of the camp.

This morning's sitting was mostly occupied with the testimony of Jas. Cornwall, a trader from Lesser Slave Lake, who had several dealings with the alleged murderer King. The one most affecting the case being the buying of the traps which are known to have belonged to the missing King. This story was practically the same as that told in the former trial and reported in the Bulletin.

EDMONTON LOST

The local baseball team played ball at Wetaskiwin yesterday. The game resulted in a victory for Wetaskiwin by a score of 2 to 1. The game was undoubtedly the fastest that Edmonton has figured in this year and such as it was the players do not seriously begrudge the winners. The Capitals played an errorless exhibition and were conceded by all to have the best of it the winning run being made by one lucky hit of the Wetaskiwin men. The locals scored the first run in the second innings and Wetaskiwin was unable to bank a man at first until the last half of the eighth innings. The score stood one to one at the end of the same innings so an extra was played, the home team being able to make the winning score. The entire game of 19 innings was played in one hour and 19 minutes, which is remarkably fast ball and such as seldom seen in the big league games.

A collection in aid of the public hospital will be taken up at the Masonic service tomorrow in the rink. The service begins at 3 o'clock.

The monthly handball button competition will be played on the golf links this afternoon, commencing at 2 p.m.

THE CITY COUNCIL

MET IN REGULAR SESSION

American Newspaper Men will be Entertained by City Council and The Board of Trade

The city council met in regular session in the chamber last evening. The commissioners were asked to report regarding a request from the Alberta Mining Co. for the extension of the water and sewer services to their property on Third street.

WILL ENTERTAIN JOURNALISTS

The secretary of the board of trade arranged for the entertainment of the American newspapermen now touring Canada. The party will arrive here on the night train, July 3. The following morning they will be met by delegations from the board of trade, and the city council, and divided into parties to be driven about the town and country. One party will visit the Clover Bar country, another the ramona district, while a third will look over the city. At 1.15 the party and delegates will dine at the Alberta, the tourists going south that afternoon. This program was adopted, and any further details on the part of the council left in the hands of the mayor.

FIRE BRIGADE ACCOUNT.

An account from the fire brigade for a cash to a fire in the west end and a couple of weeks since was ordered paid.

INSURANCE LICENSES.

Several local insurance men wrote opposing the proposed change in the license law concerning insurance companies. Messrs. R. Palmer and A. A. Jones were present to support the letter. They urged that the present arrangement tended to encourage the general agents of insurance companies to locate here and that the opposite effect would be produced by the proposed legislation. This brought on a long discussion as to the merits and demerits of licenses. The letter was finally filed and the matter will come up again in connection with the discussion of the assessment.

MISCELLANEOUS.

A draft agreement was read and amended to be submitted to the Alberta Milling Co. for signature, by which the city undertakes to extend the water and sewer services and to carry out the verbal agreement made with the company, the company agreeing to erect a mill with a capacity of two hundred barrels per day.

On petition from W. J. Webster, the commissioners were instructed to advertise the intention of the city to construct a six foot sidewalk along the south side of Third street east, between Namas and Kinistino avenues. The bylaw to be submitted to the ratepayers approving the agreement with the Alberta Milling Co. was read a first time.

A report of the commissioners recommending the payment of \$10 per

month as salary to the keeper of the dog pound was adopted.

A committee was appointed to interview Mr. Donald Ross re the purchase of a piece of land near the junction of McKay Avenue and First street to admit of the diversion of the avenue.

In reply to a question Commissioner Hargreaves said no inspector was employed by the city to overlook the construction of the cement walks. He thought the work was being well done and was keeping tab on the contractor himself.

After passing the accounts the meeting adjourned until Tuesday evening.

ACCOUNTS PASSED.

WATER SERVICE INTERRUPTED

In consequence of the necessity of connecting new water mains on Saskatchewan Avenue with the city main at Fourth street the water had to be shut off from the mains. It was expected that the work would have been completed during the night and the water tower was pumped full to provide for the night's consumption, which arrangements under ordinary conditions would have prevented any close down in the water service. In consequence of unforeseen difficulties in the trench the work could not be completed before the water stored in the tank was consumed, the public being deprived of water in consequence for some four or five hours.

When the proposed duplicate water main is laid an occurrence of this kind fraught with such danger to the city will be next to impossible.

THE TRUTH WILL LEAK OUT, but water comes in jets. If it were the other way we'd all have to be honest and we wouldn't need

THE PLUMBER.

As things are, however, all we can do is to employ an honest plumber who knows his business—one who will put in good material and put it up to stay. That's what we try to do here. We supply everything necessary for fitting up the bath-room and we do the fitting ourselves.

PARLIAMENT

(Friday, June 16)

PAY ONLY FOR THE USE OF THE LINE

On the House going into Committee of supply, Hon. Mr. Fitzpatrick, Minister of Justice, moved an amendment to the Railway act saying:

"This is the amendment to the Railway Act which provides running rights for the Intercolonial Railway over the Grand Trunk Railway from Montreal to Quebec, and over the Canadian Atlantic Railway from Quebec to Pelly Sound."

"When this Bill was up for consideration before it was suggested that possibly a claim might be made against the Government for the right that we are now taking to run over the Canadian Atlantic, without reference to the fact whether we used that right or not, it was suggested that that point ought to be made absolutely clear. I therefore move to reconsider section 5, and to amend it by adding the following proviso:

"Provided that no compensation shall be payable for such running powers unless and until the same are actually exercised, and then only for such exercise."

The motion was agreed to and the bill read a third time and passed.

GRANT FOR COLONIZATION ROADS

An item appeared in the estimates for colonization roads, Manitoba and the North West \$25,000.

In explanation Hon. Mr. Brodeur said:

"This vote is proposed to be used towards opening or improving colonization roads for the purpose of enabling settlers to take lands which they otherwise could not reach. A road is to be opened up and improved from a point near Sprague, on the southern boundary line of Manitoba, a few miles north on the line followed by incoming immigrants; one between Lake Manitoba and Lake Winnipeg; one from a point on the Prince Albert branch of the Canadian Northern Railway west of Wood; and one is to be constructed from the head of Lesser Slave Lake to the Peace River. The latter is the most expensive. The total estimated cost of these works will be \$25,000."

MR. BORDEN THINKS THE PROVINCES SHOULD BEAR THE BURDEN

On the proposal being made that the money should be handed over to the new provinces to be expended by them Mr. Brodeur suggested that it would be against the principle of responsible Government to hand it over to be spent by a Government over which Parliament had no control. In reply Mr. R. L. Borden argued that the retention of the public lands by the Federal Government had led them into the expenditure. He said:

"I do not think there is any question of responsible Government about it. Suppose you increased the provincial subsidy by \$20,000 and let the provinces deal with its own roads, there would be no violation of any principle of responsible Government. The Minister says that when the new provinces have been established there will be no further grant for colonization roads, but if that be so why is it that you apply part of this grant to the province of Manitoba? The difficulty is that the Government by retaining control of the lands which ought to be the subject of provincial legislation, is led into expenditure of this kind. The building of colonization or other roads in a purely local work which ought to be carried on by the provincial Government."

THE "FRIENDS OF PUBLIC OWNERSHIP"

The item of \$6,000 for the Government telegraph lines in the North West brought on a spirited debate in which the erstwhile friends and advocates of "Government ownership" gave that doctrine some pretty severe jabs.

In reply to a question Mr. Brodeur said it was the intention of the Government to continue the operation of the Government telegraph line from Edmonton to Qu'Appelle after the

C.N.R. line has been completed. Whereupon Mr. Andrew Ingram, M. P. voiced his unwavering faith in the public ownership propaganda thus:

"If the Canadian Northern is going to have a line to Edmonton, what is the object of the Government continuing the line?"

"I should judge that the Government line will not pay. The railway will be able to operate its line for a commercial business too."

"If the honorable gentleman looks at the map he will see that the Canadian Northern line runs from Humboldt west through Edmonton. Therefore, it seems remarkable that the Government should keep up their line to the same place. The statement of the honorable gentleman might apply very well where there is no private line; but here you have two lines in a sparsely settled country, and I see no reason why the Government should continue to keep their line up."

"The point I am making is this. Everybody knows that it requires a certain expenditure every year to keep up a telegraph line. When the Canadian Northern has a line through that section of the country, why should the Government keep up another? The poles and wires might very well be put where they would serve points which are not now served by any company."

Neither Mr. Borden nor Mr. Ingram undertook to explain why if the Government ownership of a transcontinental railway in competition with corporation roads is a thing to be desired the Government ownership and operation of a telegraph line in competition to corporation lines should not also be regarded as a benefit.

The Power Problem

The following article from the Free Press, which written with special reference to Winnipeg, may prove most interesting to the citizens of Edmonton who hope to build up here a large manufacturing city.

The Free Press says: "In determining the line of policy to be followed with regard to the proposed power supply for Winnipeg, it is exceptionally fortunate that so many cities in Canada have a varied experience in handling the problems of light and power. Canada is rich in water powers, and Winnipeg is not by any means unfortunate in its location, looked at from the standpoint of proximity to a sufficient source. Power there is within a practical distance from the city. The problems of transmission have been attacked, and the difficulties overcome. Anchor ice and extreme frost presented obstacles that bid fair to become insuperable, but engineering skill and experience have also conquered them. In thus reducing the waters to our service, in the sunny summers and the cold winters, a vast amount of invaluable experience has been accumulated. All this is at the disposal of our city council in dealing with the question of power, which now confronts them. Every eastern Canadian city has wrestled with the same question. They all have water powers and are obtaining current and light from the same at a cheaper cost than the citizens of Winnipeg. The practicability of hydraulic power has been demonstrated in all the varied kinds of weather to which in Canada we are subject. But, unfortunately, the whole of the development has passed into the hands of private corporations and the cities have granted them special privileges. It is difficult, therefore, to determine, by comparison what power ought to be supplied at to Winnipeg. In Eastern Canada the price for large lots varies all the way from \$10 to \$50 per horsepower per annum. Most of the companies in Eastern Canada are hampered by limited capital. Obsolete plants are not written off, but the money invested therein is only added to capital account. Dividends have been sustained by the uniformly good earning powers of the several companies and rates have been fixed more on the principle of how much could be obtained rather than on the cost of producing the power. The temptation to inflate capital has been yielded to very frequently and a perpetual burden has been franchised upon the consumers."

MONTREAL MONOPOLY.

No better illustration of how the public are made to pay through the nose for their light and power can be found than that supplied by the experience of the citizens of Montreal. Originally in that city power and light was developed from steam. Subsequently water powers were developed and power was obtained at vastly less cost than it could be produced from steam. But light and power was not

supplied at a cheaper rate except for brief periods when actual competition did exist. These periods were very brief, however, and at the present time, although Montreal draws her power from three different sources, she pays three or four times more for light and power than cities where

The Power Problem.

Continued from page two.

actual competition exists. Why Montreal does pay rates so high is very easily understood. At present one company controls the supply of power. In one of their recent reports occurs the following statement:

"The company was incorporated in 1901 under a special act of the Quebec legislature, granting perpetual and valuable rights in the city of Montreal and its vicinity. The Montreal Light, Heat and Power Co. now control the Montreal Gas Co., the Royal Electric Co., the Montreal and St. Lawrence Light and Power Co., the Imperial Electric Co., the Lachine Rapids Hydraulic and Land Co., the Citizens' Light and Power Co., the Standard Light and Power Co., the Temple Electric Co. All the above companies possess valuable charter rights which can now be exercised in perpetuity by the Light, Heat and Power Co."

BIG DIVIDENDS ON INFLATED CAPITAL.

The above tells a story, the lesson of which is obvious. But few cities exist whose experiences with similar companies similarly endowed with privileges and franchises, could not supply material for a story of amalgamation of competing companies, and of the ultimate infliction upon the community of high rates.

As already pointed out, Montreal companies started in the electric business by using steam power. The next step was the building of the Chambly water power plant and then the one known as the Lachine plant. These sources were not satisfactory at all seasons of the year. In winter they were subject to trouble from superior ice, and also from shortage of water. Upon the development of Shawinigan company they were placed in touch with a power that was free from either of the objections. The Montreal company, therefore, contracted with the Shawinigan company to supply it with 6,000 horsepower and later called for an additional 6,000. The price for this power measured at the Montreal city limits after being transmitted over eighty miles is six per horsepower. This is the most reliable power the Montreal company has and it depends largely upon it during the critical winter months. For their source of electric light and power they have then but one reliable source, and two plants of their own which cannot always be depended on for continuous service. Both could easily be replaced at a cost of about six millions, and for that figure could be modernized. The gas plant cannot represent an actual cash outlay of more than three millions. Nine millions, at any rate, would be ample to capitalize the business of supplying Montreal with all the power and light necessary. But instead of paying interest on that amount, the power and light consumers are taxed sufficient to pay dividends on a capital of \$17,000,000, a rounded indebtedness of \$7,753,000 and a bank loan of \$1,000,000. How this indebtedness has accumulated is very apparent. The capital, good and bad, of all the absorbed companies, and their rounded indebtedness, has been made a liability of the one company. The money invested in the out-of-date steam plants has not been written off, as the machinery depreciated in value, or become obsolete, but still remains as capital, and the consumers of light and power still continue to pay interest upon it. What has occurred with regard to the obsolete steam plants is occurring to perhaps a less extent, with the obsolete plants which the company now controls. It is not necessary for them to write off depreciation. They have a perpetual franchise, and can exact from the people rates high enough to pay interest on a capital doubly greater than actually necessary to meet the needs of the community.

HOW AMALGAMATION EFFECTS RATES.

No sooner had the companies in Montreal affected an amalgamation than rates began to ascend. A point has now been reached where it is just below the cost of steam power. It is so close to that point that an increasing number of manufacturers are installing power plants of their own, for two good reasons, the first of which is, independence and certainty of a supply, and the second is, no greater cost.

Montreal is certainly in a most unfortunate position with regard to such essentials as power and light. Something like 50,000 horsepower is required for motor use and 35,000 horsepower for light and other purposes. Within easy reach there is power in abundance, which could be developed as demonstrated by the Shawinigan company, which sells it at Montreal to the company there at \$16 per horsepower per annum. The question which faces Montreal is, how

THE NEWS OF THE DAY

IN CONDENSED DESPATCHES

Brief items from many sources tell the story of the day's events.

ENTERTAINED VISITORS

Ottawa, June 23.—The Washington press correspondents reached here tonight on a trip to Western Canada and the Pacific coast. They were received here and entertained by the parliamentary press gallery and a reception given them in the speaker's quarters when Sir Wilfrid Laurier and Mr. Borden were introduced.

MOB BARRICADED THE STREET

Lodz, Russian Poland, June 23.—Troops have stormed barricades erected at many points by strikers. Fifty persons have been killed and two hundred wounded. Martial law has been proclaimed. Cities are in a state of panic. All places of business are closed and the roar of fire arms is continuous. The mob broke the street lamps and sacked the saloons.

FIRE IN A BANK.

Vancouver, June 24.—Fire did damage to the tune of \$600 to the rooms of Manager Laing of the Bank of British North America yesterday. The caretaker threw the curtains in the hall after they became ignited and the imprisoned occupants were with difficulty rescued. Mr. Laing's stenographer fainting and added to the confusion.

RAILWAY MEN BLAMED.

Kenosha, Ont., June 23.—The jury's verdict on the accident to the passenger train on the C. N. R. at Kilmarnock: "We find that John Perry and Morton F. Stacey came to their death by collision of train 97 and extra stock train at Kilmarnock Junction at 10:53 o'clock through negligence of G. S. Morris, despatcher at Port William or Operator Bowen of Kenzie or both."

News From The Fort

From the Reporter:

A special meeting of the L. O. L. No. 1641, will be held in the Masonic Hall, Fort Saskatchewan, on Thursday, July 6th, at 7:30 p.m., arrangements will be made to attend the Edmonton celebration on July 12th. The railway engineers have been at work this week clearing the right-of-way in the neighborhood of the town and proposed station site. Dr. McQueen preached to large congregations last Sabbath at Partridge Hill and at the Fort, and on Monday night he gave an interesting and instructive account of his trip through Scotland and parts of England. Dr. McQueen's services were greatly appreciated. The collections on Sabbath and Monday amounted to upwards of \$70.

DISTRIBUTION CLAUSE

AGAIN DISCUSSED YESTERDAY

Little Progress Made—Mr. Borden's Amendment Lost—Other Amendments may be Offered

Ottawa, June 23.—Another day was spent in discussing the distribution clause of the autonomy bill without any progress being made. Mr. Borden's amendment was rejected on a division. During the discussion Mr. Oliver said that as the Opposition now found an inequality of only one in the relative representation of the north and south he hoped before the day closed they would come down to the actual and proper level. According to the leader of the Opposition there are to be other amendments.

MISCELLANEOUS

TENDERS FOR COAL.

WHAT COSTS MOST

WHOLE lot of people fancy the cigar business is a snap!

They figure out that all you need is some cases of tobacco, a few cigar makers, and the name of some stage favorite or prominent man.

The quality of the filler does not interest them at all--the binder is beneath their notice--but the wrapper and the name is all important.

They can sell this kind of cigar at \$55.00 a thousand, give a gold watch into the bargain, and then make a good size profit.

The principal cost of Pharaohs is in tobacco--I buy the best filler in the world--a Cuban leaf--one I select myself from the best of the Manicure district, in the Province of Santa Clara--a Connecticut broad leaf as binder, the most expensive in the world--and I import a clear leaf Sumatra from Holland as wrapper.

I secure by this means a superb cigar, a fragrant, even smoker--very palatable--very superior to the ordinary run of cigars.

REVILLON BROTHERS, Limited

Stories of Mutiny Repeated

Victoria, B.C. June 17.—Many tales of mutiny during the battle of the "Sea of Japan," on the part of the Russian ships are told with other incidents of the battle in Japanese newspapers received by the steamer Athenian today. Survivors state firing had not been long in progress before many of the men became so panic-stricken that they were unfit for anything like efficient service. Two gun crews on the Dmitri Donskoi, which had been torpedoed at night, mutinied when the presence of the enemy was suspected and were only kept at their spiritless tasks under threats of being shot down. A petty officer of the Donskoi told the attitude of many on that vessel under fire was cowardly in the extreme and when the facts were matters of official record many prisoners now in Japan would not seek to return to Russia at the end of the war.

Survivors also praised the work of the Japanese torpedo craft which, though the Russians were diligent in the use of searchlights, daringly harried the Russians and with cunning tactics did effective work, being responsible for injuries resulting in the quick disposal next day of ships which escaped destruction by them.

According to Japanese papers the torpedo craft went into action resolved to wipe out a bad record made earlier in the war. Togo had made stringent comments on the failures of torpedo officers in the first attack at Port Arthur and at the attack on the Sasebo at Port Arthur. The officers were determined to achieve something to earn the admiral's commendation on this occasion, or die. The small craft attacked both by day and night upsetting theories of this branch of naval practice. One instance recorded of the deeds of the torpedo craft shows that one of the three torpedo vessels lost was disabled at a distance of 400 yards from a Russian battleship, and another torpedo craft darted in and took off her crew, while she was in a sinking condition without sustaining loss from the Russian fire.

The destroyer Sazanami, which won such renown by her fight with two Russian destroyers off Port Arthur when the vessels brushed sides as they fought, won further renown. It was she that found the Russian destroyer Beyedovi at Ulleung, and captured Rojstvensky, and staff. The Beyedovi fought desperately, but was finally compelled to surrender. Commander Tsuneko has been given the order of the Kite for his capture.

When captured Rojstvensky wore no tunic. He was in his shirt with a mangled arm, which hung useless at his side. He is resting at the Sasebo hospital, near the captain and vice-captain of the Admiral Nakhimoff, who were picked up on drift wood by fishermen with their clothes soiled and their faces burned with powder. Fishermen clothed and fed them and took them to Sasebo. Fishermen and villagers on the coast are burying large numbers of mangled dead who have drifted ashore. Many of the bodies are badly torn by gun-wounds, some terribly earned.

In a list of casualties published by Japanese paper it is shown that the Japanese killed numbered 113 on all ships, severely wounded 104, and slightly wounded 270, a total of 587. It is significant that the most casualties occurred on Togo's flagship, the Mikasa, which had eight killed and 25 wounded. The greatest number of killed on any vessel were lost on the Shikishima, which had 13 killed and 24 wounded. The fog which prevailed on May 27 in the straits of Tsushima induced Rojstvensky to attempt the passage. He previously intended to try to run through at night. Further, when the Japanese fleet was seen Togo had craftily hidden the greater part of his fleet, so that the Russians were deluded into the belief that only part of the Japanese strength was to be encountered. When the battle was commenced with a shot from a twelve inch gun of the Nikolai, the Russians were in such faulty formation that demoralization soon followed the cannonading which began as the Japanese surrounded them.

A theory upset by the battle was that a battleship cannot be sunk by gun fire. It was shown according to advices by the Athenian that the Oryaba and Svaroff were sunk by Japanese guns. They owed their fate to the heavy sea running at the time the Japanese having had long practice firing in heavy sea, and when the ships were rolling, exposing unprotected parts, the gunners secured many hits on the port side, fatally breaching holes in their watertight compartments, which were situated fore and aft. With the filling at the port compartment the vessels rolled over and went down.

The battleship Orei, which surrendered and was brought to Matsuru

dockyard had forty shot holes in her hull. Blood and mangled flesh was scattered on the decks, and many corpses were buried at sea. The battleship was to be sent without delay to Yokohama for inspection by the emperor.

Foster's Forecast

Washington, June 21.—Last bulletin gave forecast of disturbance to cross continent 18 to 22, warm wave 17 to 21, cool wave 20 to 24. Next disturbance will reach Pacific coast about 23, cross west of Rockies by close of 24, great central valleys, 25 to 27, eastern states, 28. Warm wave will cross west of Rockies about 23, great central valleys, 24, eastern states 27. Cool wave will cross west of Rockies about 26, great central valleys, 28, eastern states 30.

This disturbance will bring severe weather, but it will be mild compared with the standard set up by the recent April and May weather. About 23 and 24 a great increase will occur in the intensity of all weather events and the warm waves, cool waves, winds, rains and all weather features will become more marked and noticeable. Within three days, 23 to 25, an electric storm may be expected accompanied by severe thunder storms. About that time the storm waves are expected on the Atlantic and Pacific slopes, with a large high and cool wave in the great central valleys. Severe storms are probable about that time, but I will not now undertake to locate them. In earthquake and volcanic countries that class of disturbance will become more active.

About 28 the storm forces will again greatly increase and will develop intensity in the hot waves, cool waves, sudden changes, heavy rains in small sections, increasing severity of drought in some southern localities, severe thunder and hail storms in many sections.

The week of which 24 will be central day will average unusually cool in some sections east of Rockies. The month will go out with rising and higher average temperatures, warmest average in New England States. Some very cool weather about Toledo and the lower lake last week in June. General rains deficient, but some heavy local rains.

Following June 17, weather will be radiant, averaging very cool. Last half of month is expected to bring poor crop weather, too cool for corn, too dry for cotton, too damp in half the northern wheat section.

CHURCH SERVICES

All Saints, Anglican.—Services as usual at 11 a.m. and 7 p.m. Rev. H. A. Gray preaches at the morning service and Rev. H. H. Wilkinson in the evening.

Baptist.—The regular evening service at the Baptist church will be withdrawn tomorrow to permit the congregation to attend the mass meeting at the rink. The morning service will be conducted by the quartette of the band.

McDougall, Methodist.—The morning service will be conducted by members of the McMaster band.

Grace Methodist.—Rev. J. Tuttle will preach morning and evening.

Presbyterian.—Rev. Mr. Griffith of Hoonah, Chma, will preach at the morning service. Rev. D. G. McQueen will preach in the evening.

THE GUM REMOVED

THE microscope shows each leaf of tobacco is covered with long soft hairs which exude a viscid juice.

This is called the gum, and it covers the surface with a moist glutinous exudation.

Tobacco, to be good, must have all this gum driven out.

In Manicacagua I procure tobacco that has all this gum "sweated" by the natural heat of the climate.

Only the dry, well matured leaf remains—the leaf that when I age for three years will give a cool, fragrant smoke—odorless and aromatic—that's the characteristic odor of my Pharaoh.

None genuine unless branded PHA-RO

Monkey Brand Soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal.

HOT AIR FURNACES

If you have any idea of heating your house with hot air, it will pay you to look into the "PEASE."

This Furnace is considered one of the very best made, and when installed by a first class mechanic is sure to give satisfaction. Ross Bros are the sole agents for this district, and they employ none but the best workmen, as some of the following testimonials from some of our best known citizens should convince you. We have a large number of these testimonials, every one of which is from gentlemen who have used the PEASE FURNACE.

We put a large number in Edmonton during last year, and in every instance the purchasers were well pleased, and do not hesitate to speak in the highest terms of them.

TESTIMONIALS.

From MALCOLM Groat, Edmonton.

J. J. MELLON, Strathcona.
JAS. H. WOOD, Athabasca Landing.
W. B. COOPER, Edmonton.
KING POWELL, Edmonton.
J. B. MERCER, "
C. W. CROSS, "
K. J. MANSON, "

Sole Agents for Edmonton ROSS, BROS. Limited.

Ross Bros.,
Gentlemen:—

The hot air heating system that you installed in my house last summer, and which has been thoroughly tested during the past winter, has given me splendid satisfaction. All parts of my house, which are in an exposed position on the crest of the river bank, were comfortably heated at all times. The coal consumed during the winter was not large, and it burns the Edmonton coal perfectly. I am very well satisfied with the heating system, and the workmanship and the material used on the job is of the best, and would recommend your furnace to any one.

Yours truly,
MALCOLM Groat.

Ross Bros.,
Gentlemen:—

Replying to yours re the furnace I purchased from you and which your workmen put in my store (The Hudson Bay Store) I am well satisfied with it. The store is 35 x 40, with a 15 foot ceiling, plate glass front, and when the thermometer stood a 22 below zero the store was easily heated to 90 degrees. The workmanship is first class in every particular. The fuel consumed is small considering the results we get. There is no smoke or leakage of gas, and the furnace is very easily managed. I can heartily recommend your furnace to any intending purchaser, as I am sure there can be no fault found with them.

Yours truly,
JAMES H. WOOD

Ross Bros.,
Gentlemen:—

Regarding the warm air furnace which you installed in my house. I may say that I am perfectly satisfied with it. I had no difficulty whatever in heating the whole house in all kinds of weather. No heat is wasted in the cellar, and I had no trouble with the pipes not working in windy weather. I find it easy to manage, and economical on fuel, and were I to build again, I would have no other kind of furnace, and I would recommend it to any person wanting one.

Yours truly,
W. H. COOPER.

Ross Bros., Limited,
Gentlemen:—

The furnace you placed in my house last year has given us the very best of satisfaction, and every room in the house is evenly heated, and I find that it burns the Edmonton coal very economically, and is easy to manage and free from dust or gas. I would cheerfully recommend it to anyone.

Yours truly,
KING POWELL.

Ross Bros., Limited,
Gentlemen:—

The Furnace you placed in the house I live in (owned by J. N. Pomereau) has given me perfect satisfaction. In fact we can make it too warm to live in if we were to let the Furnace burn freely, and have never been troubled with either smoke, gas or dust. I find it very easy to manage, and I am certain we could not keep the house as comfortable with stoves on anything like the same amount of fuel, and would recommend it to any person wanting a good Furnace.

Yours truly,
J. B. MERCER.

Ross Bros.,
Gentlemen:—

After using your Furnace all winter it gives me great pleasure to recommend it to any one. I used another make of Furnace for four years in the same house, previous to getting this furnace from you, and find your Furnace a great improvement over the old one. I find it free from dust, gas or smoke, and easy to manage, and that the grate burns the Edmonton coal perfectly. My house is more evenly heated with only a little over half the fuel, and I might say that the material and workmanship in connection with the installation of the Furnace is of the best.

Yours truly,
R. J. MANSON.

Messrs. Ross Bros.,
Gentlemen:—

The Furnace you installed in my house last summer has given me perfect satisfaction in every respect, and free from gas or dust, and find that I get more heat from less fuel out of your Furnace than I could from the old Furnace you took out. Therefore I would cheerfully recommend your Furnace to any person wanting one.

Yours truly,
C. W. CROSS.

Ross Bros.,
Gentlemen:—

The hot air heating system that you installed in my hotel, has proved to be all and more than you represented it to be, and would not change it for the old system if I had to pay double what it cost me, as I find your Furnace only uses about half the amount of coal that the old Furnace used. In fact one Furnace now heats the whole hotel, except in extreme cold weather, while it took both the old Furnaces going full blast all the time to heat the hotel other winters.

I find your furnace not only a fuel saver, but easy to manage, free from dust, smoke or gas, and would be pleased to recommend it to any person wanting one.

Yours truly,
J. J. MELLON, Strathcona.

Ross Bros. Ltd.

The Power Problem

Continued From Page Three.

to get the power to the consumer at about that figure. At present the city is handicapped, for which it has only itself to blame. As far as cheap power is concerned, she has no inducements to offer to intending manufacturers. Monopoly determines the price, and the knowledge of this fact cannot fail to deter the industrial expansion of Canada's chief city.

When the statement is made that \$5,000 horsepower is used in Montreal, it should not be forgotten that the company do not guarantee to supply motor power at certain hours during the day. At a certain hour in the afternoon they cut off the motors and use the current for the lighting. The maximum load for this is needed when all the stores are using it, and residences as well. At such hours the motor users are liable to run short. The Shawinigan Company only supply what power they have in excess of their own requirements. In this way the company practically sell their power twice over, or with an actual capacity of 50,000 horsepower they sell that quantity for motor use up to four in the afternoon and then sell it again for lighting after that time and collect for 100,000 horsepower.

POWER CONDITIONS IN QUEBEC.

In Quebec they are better off than in Montreal. There is some show of competition. Power can be had from \$25 to \$35 per annum, according to quantity used. A few years ago the Jacques Cartier Power Co. entered the market, and competition did exist in reality for a considerable period. It was soon discovered, however, that competition did not pay the companies, and therefore amalgamation took place, or practically so. The capitalization was largely inflated, and the dividends were not easily made under competitive conditions. With the arranged prices however Quebec is in a very much better position than Montreal.

OTTAWA'S FIGHT FOR FAIR TERMS.

In Ottawa three companies are organized for the sale of light and power. The original one was the Ottawa Electric Co. It carried on business for several years. In order to get competition the council of Ottawa granted a charter to the Metropolitan company. It was never able to deliver power as the credit of its promoters was battered by the rivals. The Consumers' Company came into the field, and rates went down, but still a margin is left for dividends when the balance of the developed power is disposed of, which will occur before the expiration of the year. The price of power in Ottawa runs from \$25 to \$35, to small consumers, to \$15 to large consumers. There are isolated cases of the sale of electric power at as low a figure as \$10 per horsepower per annum. The International Cement Co. for 2,000 horsepower pay \$15. For lighting the rate is 6 cents per watt hour.

COMPANIES' DISRESPECT FOR CONTRACTS.

These two Ottawa companies eventually effected an amalgamation, in spite of the distinct provision in the franchise of the Consumers' Co. that they would not allow this to be done. The Ottawa council then had a bylaw passed which gave them permission to buy poles and wires of the Consumers' Co., so that a municipal plant might be started to prevent Ottawa being held up. This by-law was endorsed by the ratepayers by a very large majority on a very large vote, which indicates how keenly the citizens regarded the situation they were placed in. Ottawa city, however, is limited to a capital expenditure of \$250,000 on a municipal lighting plant according to provincial legislation. Negotiations are pending as to the price to be paid for the poles and wires. Immediately after the bill permitting the amalgamation of the Ottawa companies at a time when the Ottawa council were considering the purchase of poles and wires, they asked the Ontario government to extend their powers for financing a municipal plant. What they desired was permission to raise \$500,000 to enable them to purchase a site at some point on the river adjacent to the city. In this application they were met with opposition from the Ottawa Electric Co., an opposition that was successful. Ottawa city is thus placed in a very awkward position. On the one hand subject to a monopoly of the supply of light and power, and on the other restricted from raising enough money to establish its own plant. Notwithstanding the city is going ahead, and will endeavor to

find other means of defeating the ugly combination of powers that beset her. The council are apparently in earnest and rather than submit to any raising of rates, propose to rent power. They realize now that the mistake was made at the outset, when they gave privileges away. The company with franchise rights has powers which do not stop at raising of rates and charges, but are a factor to be reckoned with at the seats of legislation.

TORONTO'S LACK OF POWER

Toronto's position with regard to power is very much like that of Winnipeg. Hydraulic power has never been transmitted to the city, and hitherto they have relied on steam development. This method is so expensive that industries that would naturally have settled there have gone to the many other places in Ontario where power is available at much less cost. An electrical development company in course of formation, but it is controlled by the same group of capitalists as now dominate the Street Railway Co. and the Lighting Co. Notwithstanding this fact it is expected that power will be supplied much cheaper when the proposals of the new company are carried out. They propose bringing the power from Niagara, a distance of 120 miles.

Educational Institutions:—Public and separate schools, high school, Alberta College.

CHURCHES:—Roman Catholic, Anglican, Presbyterian, Methodist, Baptist, German Baptist, Lutheran, Salvation Army.

TRAIN SERVICE:—Leaves for Strathcona 7.45 and 15.30. Arrives from Strathcona 9.15 and 19.50.

LOCAL

—The Edmonton baseball team will play at the Fort Monday evening.

—Installation of officers in the Jasper Lodge A.F. & A.M. takes place tonight.

—Principal Riddell will occupy the pulpit in McDougall Methodist church Sunday evening.

—Harry Brown, of Brown Bros. Limited, Toronto, is in the city on a business and pleasure trip.

—The case between the two Chinamen was adjourned at yesterday's court to the evening of the 26th.

—E. T. Tims secretary of the exhibition association, requests those having rooms to rent during the fair to communicate with him.

—The Masons attend service in the rink tomorrow afternoon. The members will meet in the hall at 2.30. Rev. H. A. Gray will conduct the service.

—There was a large attendance at the dance given in the rink last evening by the City Band, and a very enjoyable time in reported by all present.

—Wm. Hill accused of testing the police of Jno. Sullivan was heard in police court last evening and judgment was reserved until next Wednesday.

—The farewell service of the McManus band in the city will take the form of a gospel song meeting at the Thistle rink theatre on Sunday evening at 8 o'clock.

—The case of the police against Jno. McLeod accused of robbing his partner at the Jasper House last Wednesday evening, will be heard in court at three o'clock today.

—The funeral of the late Magnus Anderson takes place from his late residence on Sunday afternoon at 2 o'clock. The service will be held in the Presbyterian church.

—Cool weather has continued in Alberta, Saskatchewan and Assiniboia moderately warm in many parts of Manitoba. The thermometer registered quite low during the night.

—On Thursday evening of next week Strathcona and the Ingletons of Edmonton will again meet on the ball grounds in Edmonton to play an exhibition lacrosse game at 7 p.m.

—Chronicle: The merchants of Strathcona wish all to thoroughly understand that all business places will be closed at 12 o'clock on Friday the 29th inst., and Saturday the 30th inst., at the same hour, and remain closed from that hour each day.

—The Hudson Bay Co's steamer, which arrived in the city a couple of days ago, will leave for Prince Albert and the Grand Rapids this evening. A large load of flour and provisions will be taken from here to Port Pitt.

—It is announced that Mr. Jas. McKernan of Athabasca Landing, has been requested by a large number of influential electors in Athabasca constituency, to be a candidate in that constituency in the provincial elections, and he has decided to accept.

—Reporter: Postmaster A. W. M. Campbell returned Tuesday evening after a trip to Toronto and eastern points, where he had gone on account of the illness of his son. "We are pleased to hear that he is in better health now," Mr. Campbell states that he saw no sections of country which could be compared with Alberta in regard to the advanced state of the crops and the favorable weather.

—The plot of El Capitan, which opens the Rosina engagement at the Thistle rink, next Tuesday, June 27, concerns Don Enrico Medina, a

Spanish grandee, who has been appointed Viceroy of Peru by the King of Spain, who deposes one Don Luis Carraro for conspiracy. The latter nobleman at once forms a band of insurgents who ravage the surrounding country, and frightens Don Medina, who at heart is a veritable coward and braggadocio. Being closely pressed Medina persuades his henchman Pozzo, to assume the pose of Viceroy and he disguises himself as El Capitan, finally entering the ranks of the insurgents. His boastful nature attracts the attention of Estrella, Carraro's daughter, and she falls desperately in love with the assumed El Capitan. This state of affairs becomes apparent to Saramba, Estrella's lover, and to the Princess Margherita, El Capitan's wife. They proceed to make it warm for this boastful Lothario. He becomes embroiled in all sorts of ludicrous and exciting adventures.

C. N. R. PROGRESS

M. H. Myleed, chief engineer of the C.N.R. arrived last night from the construction camp. Mr. McArthur claims he can complete the grade to Edmonton by August and the completion of the line to the city during the summer is assured. Tenders will be called at an early date for the erection of a depot here. The bridge at Fort Saskatchewan can be built in six weeks if necessary and no delay will occur on this account.

PERSONAL

Rev. J. Tuttle, the new pastor for Grace Methodist church, arrived during the week from Nova Scotia, and will conduct services tomorrow.

Rev. H. H. Wilkinson, who will be in charge of the new Anglican mission in the east end of the city, arrived during the week and will preach in All Saints church tomorrow evening.

REAL ESTATE MEN IN COUNCIL

Some real estate men of the city held a meeting yesterday afternoon in the council chamber to discuss the conditions under which property is being bought and sold here at present, and to take such measures as might seem desirable to prevent unreliable and irresponsible persons carrying on the business of real estate agents.

Mr. Stephen was voted into the chair and drew attention to the fact that the agents who pay the license fee and conform to the bylaws are not receiving such protection as they are warranted in expecting from the civic authorities.

The suggestion was made that instead of it being necessary to have a special levy to get funds for advertising the advantages of this district and for showing visitors around, the proceeds of the licenses should be devoted to this purpose.

It was decided that an "Edmonton Real Estate Association" should be organized, and a committee was appointed to draft bylaws and constitution, and to attend to the interests of the body generally.

There was some discussion as to the payment of commissions on sale of property, as to the fixing of a minimum rate, and as to the listing of property with several agents at the same time, but it was thought better to refer these matters to the committee, which consists of Messrs. Stephen, Haldane, Lee, York and Gilbert.
